

ICO GUIDE

Recommended Version

In order to invest in WAWLLET's ICO, a number of very important requirements & regulations must be fulfilled and respected as described below.

Contents

1. Accepted payment methods
2. How to invest using ethers
3. How to invest using Bitcoin
4. How to invest using bank account transfer

1. Accepted payment methods

Ether, Bitcoin and Bank Transfer

- a. Ether. All investors must open an account at
- b. <https://www.myEtherWallet.com> - this account is used to receive the WIN Tokens and also for the customer identification. The same Ether address may be used for payment as well.
- c. Bitcoin – For Payment ONLY
- d. Bank transfer – For Payment ONLY

2. How to invest using ethers

- a. Go to <https://www.myEtherWallet.com>
- b. Enter a strong yet easy to remember password. Do not forget it.
- c. This encrypts (protects) your private key. It does not generate your private key. This password only, will not be enough to access your Ether/Tokens.
- d. Click the “Create New Wallet” button.
- e. Download your “Keystore UTC/JSON” file, save this file and keep it safe.
 - i. This is the encrypted version of your private key. You need the password to access it. It is safer than your unencrypted private key but you must have your password to access it in the future.
- f. Read the warning. If you understand it, click the “I understand. Continue” button.
- g. Print your wallet backup paper and/or carefully hand-write the private key on a piece of paper.
 - i. If you are writing it, it is recommended to write it 2 or 3 times. This decreases the chance your messy handwriting will prevent you from accessing your wallet later. MyEtherWallet.com does not hold your keys for you. They cannot access accounts, recover keys, reset passwords nor reverse transactions. Protect your keys & always check that you are on the correct URL.
- h. Let’s see if everything is correct. Click on “Send Ether & Tokens” button located on the main menu and select “Keystore File (UTC/JSON)” option
- i. Select your “Wallet file” you saved before, enter the password and click “Unlock” button
- j. If all the information is correct you should be able to access your wallet. Every time you want to access your stored funds you must complete the same process (That means g. and h. above)
- k. Once you access your account, you can locate your Ether address on the right side “Account Address”, it should be something similar to “0xDA03a8A78dd0396937419667162Abd67d21DC346”
- l. Copy & paste your address into a separate text document.
- m. If you want to be sure that the generated address is correct and functional, you may search your address on <https://etherscan.io/> . On the top right-side of the page you should see a form where you have to paste your ether address generated on myetherwallet.com and click GO. If everything is correct you will see that your balance is 0. This is how you will view your balance at any time
- n. Send a small amount of Ether (minimum 0.001 ETH) from your previous wallet or exchange to your new wallet.
- o. Go back to myEtherWallet.com and unlock your new wallet from the “Keystore/UTC file” or via the private key that you printed out. Ensure it unlocks the proper wallet and it matches the bookmark you have.
- p. Do not simply leave your new wallet open. Pretend you are coming back a year later to access your values.
- q. Send a small amount of Ether (minimum 0.001 ETH) from this new wallet to another address.
- r. Ensure you have recorded all necessary bits of information and the addresses match at all times. If they don’t, that means you miss-wrote something, somewhere, so start from the beginning in order to make sure you never lose access to your funds.
- s. Doing all of this might look tedious, but it ensures you:
 - i. Have completed access to your funds
 - ii. Have a proper address that is correct and matches the private key you have saved
 - iii. Keep safety for years to come, being able to access your ETH/Tokens later.

- t. Contact the WAWLLET team in order to send the Ether address generated by myEtherWallet.com
- u. All investments in the WIN Tokens are mandatory to be received from this address, any funds received from other addresses will not be considered

3. How to invest using Bitcoin

- a. All the investors who want to use Bitcoin as a payment method to buy WIN Tokens must follow the same process detailed at 2, except 2.t.
- b. Once you have contacted the WAWLLET team (described at 2.s.) we will send you the bitcoin address where you have to send the funds you want to invest.
- c. You will receive your WIN Tokens at the address you have generated (see 2.j)

4. How to invest using bank account transfer

- a. All investors that want to use Bank Transfer as a payment method to buy WIN Tokens must follow the same process detailed at 2, except 2. t.
- b. Once you have contacted the WAWLLET team (described at 2.s.) we will send you the Bank Details where you have to send the funds you want to invest.
- c. You will receive your WIN Tokens at the address you have generated (see 2.j.)
